Contents

Volume 195 (1988)

Reviews
A mutagenicity assessment of acetaldehyde (MTR 07239)
V.L. Dellarco (U.S.A.) 1
Inhibitors of *N*-nitroso compounds-induced mutagenicity (MTR 07237)
T. Gichner and J. Velemínský (Czechoslovakia) 21
Acrylamide: its metabolism, developmental and reproductive effects, genotoxicity, and carcinogenicity (MTR 07238)
K.L. Dearfield, C.O. Abernathy, M.S. Ottley, J.H. Brantner and P.F. Hayes (U.S.A.) 45
Genetic Mechanisms in Tumour Initiation and Progression, No. 8
Transformation of avian lymphoid cells by reticuloendotheliosis virus (MTR 07241)
B.E. Moore and H.R. Bose Jr. (U.S.A.) 79
Griseofulvin (MTR 07243)
by L. De Carli and L. Larizza (Italy) 91
Genotoxic effects of fluoride: a controversial issue (MTR 07246)
by Y. Li, A.J. Dunipace and G.K. Stookey (U.S.A.) 127
Interaction of lipid peroxidation products with DNA. A review (MTR 07242)
by C.E. Vaca, J. Wilhelm and M. Harms-Ringdahl (Sweden, Czechoslovakia) 137
A comparative analysis of data on the clastogenicity of 951 chemical substances tested in mammalian cell cultures (MTR 07240)
by M. Ishidate Jr., M.C. Harnois and T. Sofuni (Japan) 151
Genotoxicity of active oxygen species in mammalian cells (MTR 07244)
R. Meneghini (Brasil) 215
Activation of the *abl* oncogene and its involvement in chromosomal translocations in human leukemia (MTR 07245)
D. Rosson and E.P. Reddy (U.S.A.) 231
Genetic Mechanisms in Tumour Initiation and Progression, No. 9
The role of multiple oncogenes in hematopoietic neoplasia (MTR 07247)
R.C. Schwartz and O.N. Witte (U.S.A.) 245
Genetic Mechanisms in Tumour Initiation and Progression, No. 10
The *ras* gene family and human carcinogenesis (MTR 07248)
J.L. Bos (The Netherlands) 255
Genotoxic properties of 1,3-butadiene (MTR 07249)
C. De Meester (Belgium) 273
